

PARASMANI

tubes you can rely on

Cold. Process. Industrial.

**INDUSTRIAL & PROCESS USE COPPER TUBES
MANUFACTURED TO ASTM B280 / B75**

- ✓ Rated to -40°C , No Embrittlement
- ✓ All Major Industrial Refrigerants

PARASMANI COPPER TUBES

Copper Tubes
by Parasmani

Parasmani

is a leading manufacturer of high-quality copper tubes, serving medical gas, HVAC, refrigeration, plumbing, fuel gas and industrial applications across India. With an annual production capacity exceeding 3,600 MT, Parasmani is recognised for consistent quality and technical precision, partnering with OEMs, engineering firms and industrial customers across India through a strong Pan-India network and strategic stock points.

Parasmani manufactures copper tubes for cold storage, food & beverage, life sciences, heat exchangers, marine and defence — from cryogenic blast freezers to high-temperature process circuits, one supply source with mill test certificates as standard.

Manufactured in compliance with: ASTM B280 / B75

Pure at the Core

Manufactured from C12200 DHP (phosphorus-deoxidized copper) at 99.90% purity. Consistent wall thickness gives predictable pressure performance across the full run, and every consignment ships with mill test certificates for consultant and contractor sign-off.

Material Grade	C12200 (DHP) / CW024A
Copper Content	Cu 99.90% minimum (including silver)
Phosphorus (deoxidizer)	0.015–0.040%

Why Copper for Industrial Applications

From cryogenic refrigeration to demanding process systems, Parasmani copper tubes deliver reliable performance, exceptional heat transfer and long-term durability in harsh industrial environments.

Cryogenic ductility — full strength and toughness at deep sub-zero temperatures, no embrittlement or cracking under repeated cycling.

Refrigerant compatible — Compatible with HFC, HFO and CO₂ (R744) refrigerants. Not suitable for ammonia (R717) systems.

ASTM B280 cleanliness — factory degreased and end-capped — no residual cutting oils to contaminate compressor lubricant.

What We Supply

A complete copper piping solution for industrial and process applications; hard tubes, soft coils and fittings. Matched specifications, consistent quality and mill test certificates as standard.

Product	O.D. Range	W.T. Range	Temper	Length
Straight Copper Tubes	6 mm – 130 mm	0.70 mm – 3.25 mm	H / HH / QH	3 m
Pancake Copper Coils	4.76 mm – 22.23 mm	0.40 mm – 1.20 mm	Soft Annealed	15.24m
Copper Fittings	6 mm – 130 mm	0.60 mm – 2.50 mm	Wrought type	–

Built for Industrial Duty

Parameter	Capability
Operating temperature	Deep sub-zero to high-temp process service
Ready-stock max O.D.	2½" — fast dispatch on standard sizes
Large diameter available	Up to 5½" O.D. for headers & condensers
Custom lead time	Typically 15 days
Documentation	MTC standard

Transcritical CO₂ (R744) runs up to ~130 bar — verify wall thickness against system MAWP

Where We Are Specified

Parasmani copper is installed across the cold chain and process industries in India — from single blast freezers to project-scale cold storage warehouses, from craft breweries to central pharma distribution hubs. The same tube grade, cleanliness and documentation reach a walk-in cold room in a retail store and a defence cold storage facility on a strategic site.

Sector	Applications
Cold Storage	Blast freezers, walk-in cold rooms, ice plants, cold storage warehouses
Food & Beverage	Dairy chilling, breweries & distilleries, sugar evaporators, confectionery
Life Sciences	Pharma & vaccine cold chain, blood banks, hospital central chilled water
Process & Industrial	Heat exchangers, data-centre precision cooling, chemical & power plants
Infrastructure	Marine & offshore, defence & railways, smart-city district cooling

Approvals & Documentation

Parasmani is approved or specified for projects by CLW (Chittaranjan Locomotive Works, Indian Railways), SBI, CSIR-NAL and CHIRAAG (Government of Chhattisgarh). Marine-grade C12200 tubes are available for offshore and defence applications, with custom wall thicknesses for elevated-pressure service. Visit our website to explore the latest approvals, certifications and project approvals.
